

**SAMEC GROUP**  
DE MÉXICO

MOLDS DEVELOPER

SAMEC GROUP of Mexico is a company with more than 20 years of presence in Mexico and backed by the Italian technology of its headquarters in Padova, Italy, which has more than 40 years in mold manufacturing.

Investing in cutting-edge technology has allowed us to obtain results in the process of continuous improvement for our clients over the years, starting with the manufacture of footwear molds to currently developing aluminum and steel molds for all models. industries.

# MISSION

Promote innovation by creating designs and adapting to each of the industries that are looking for new molding projects; We seek to demonstrate what true quality is, both in our products and in the service we provide to our customers. Making a difference in each project, renewing day after day, thus being prepared for new challenges.

# VISION

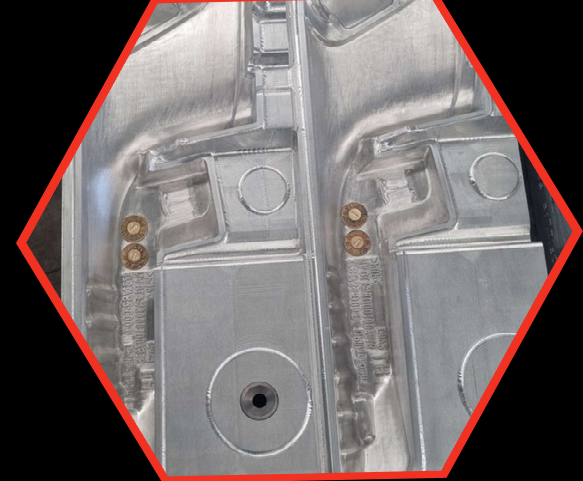

Committed to being the best developers, recognized for our work that distinguishes us for quality, excellent experience, service and adaptability to changes.

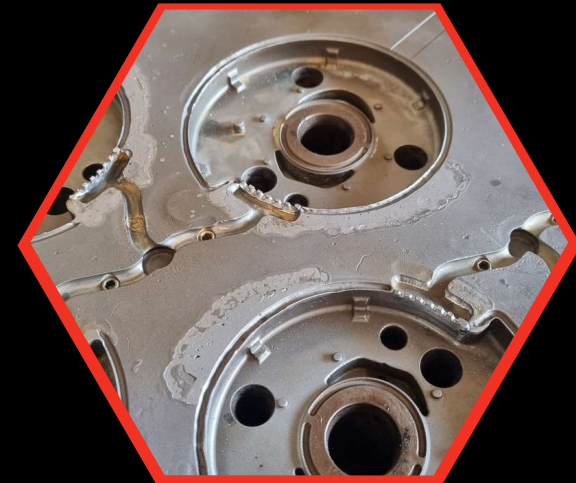

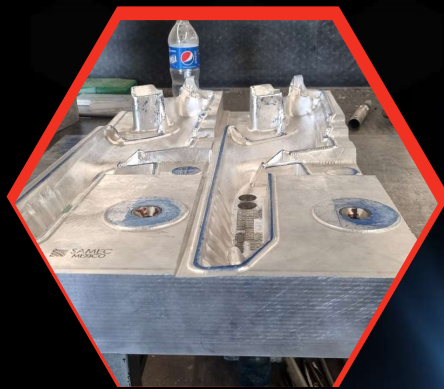

SAMEC GROUP has its own facilities, located for 20 years in the Delta Industrial Subdivision, the productive heart of the city of León, Gto. We have more than 1,100 M2, distributed between the production plant, administrative and commercial offices, modern and cozy.

THANKS TO ITS STRATEGIC GEOGRAPHICAL POSITION, SAMEC GROUP OF MEXICO COVERS CLIENTS IN A LARGE PART OF THE AMERICAN CONTINENT, AND ALLOWS IT TO HAVE REFERENCES THAT PLACE US ON THE WORLD MAP.

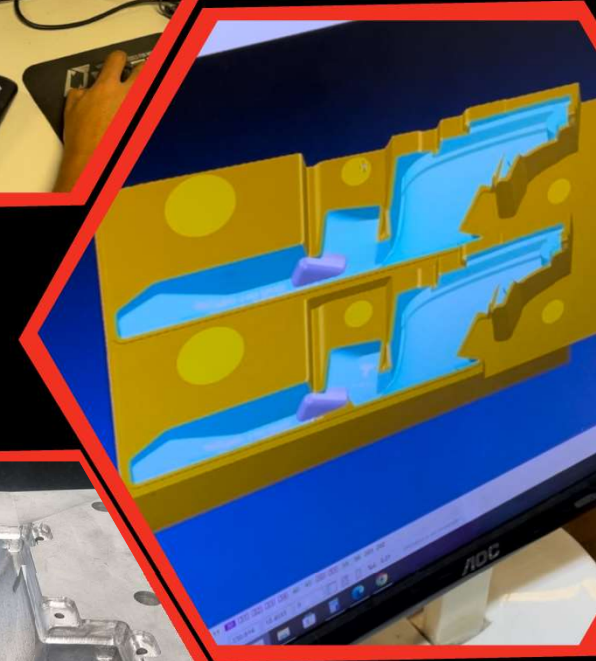

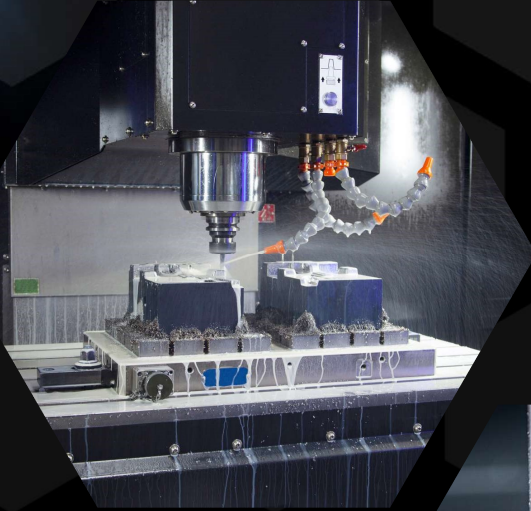

We offer our know-how regarding satisfying the transformation of thermoplastics into the final product in a more productive, efficient, effective way, with the best material, delivery time and fair prices.

# DESIGN

In the design and development area, which is the heart of the company, we carry out rigorous studies of the model, to be implemented in the design and development of the product and we work in constant contact with the client. We have highly advanced manufacturing systems (for example, 3D CAD/CAM and reverse engineering using a laser system) and we always work in close contact with the various production units to satisfy the needs of our clients and offer them the best quality, in time and results. Based on optimal quality standards, we can offer a complete service package that includes everything from design development, product manufacturing to final mold testing.

Currently, we have 6 CNC machining centers, of which one has 5 axes, one has 4 axes and the others have 3 axes. Also with laser digitizer for reverse engineering, complete EDM for steel molds and all other tooling to satisfy any customer need, guaranteeing high quality production even in very complex designs.

# What we offer?

**Mold making**

**Mold modification**

**Mold maintenance**

**Mold repair**

**Engineering changes**

**Steel grafts**

**General cleaning**

**Machining of molds in 3  
and 5 axes Machining of  
automotive parts  
Digitalization**
