Who Are We?

TIERRA TECH DE MÈXICO S.A DE C.V is a manufacturing and marketing company that designs ultrasonic cleaning systems, with more than 10 years of innovation and development of technology in industrial parts washing.

What Do We Do?

TIERRA TECH DE MÉXICO S.A DE C.V offers standard inline ultrasonic cleaning equipment and solutions or projects tailored to the client's needs that provide optimal cleaning, using a proportion of water and chemicals together, applied to national and international companies in the automotive, food, medical, graphic, electronic, plastic injection sectors and many more. Rely on us for manual or automated designs, specially designed for the cleaning of each of your parts, thus improving your production process.

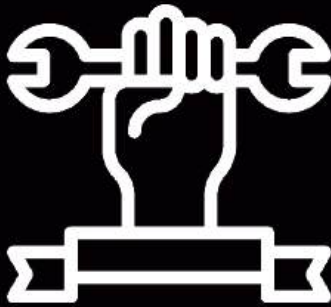

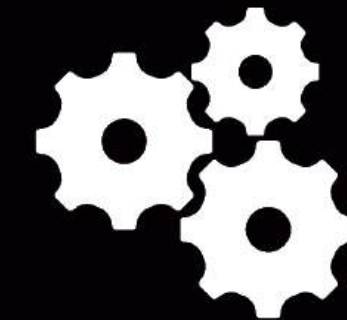

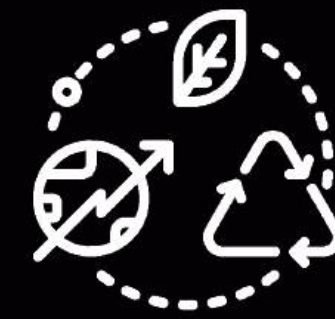

Business Values

MISSION:

Our mission is to satisfy the needs and requirements of our customers, using efficient and cost-effective technologies, processes and systems, with a constant commitment to quality, safety, social and environmental responsibility, through innovation, development and continuous improvement of our products and services.

VISION:

To be an innovative company always at the forefront of trends and technological advances, the first option in specialized project management at a national level for the industrial and automotive sector, being socially responsible and environmentally friendly.
