

>INDIRECT SUPPLIER

CAPRICORNIO INGENIERÍA is a manufacturer of material conveyors and pedestal, overhead, floor and matrix conveyors. Design, manufacture, installation, and maintenance of material conveyors and roller conveyors; manufacture of structures, metal racks, pneumatic and electromechanical systems. Installation of robots, telescopic booms, monorails, automation, control panels, lighting systems, overhead traveling cranes.

PRODUCT

The design, production, manufacture, installation, and commissioning of mechanical and electrical engineering components for all types of conveyors, as well as the maintenance, upgrading and machining of parts for their assembly.

CAPABILITIES

Machining center with 3- to 5-axis high precision CNC machines and detail parts capability, laser pantograph, profile roller.
