Our services

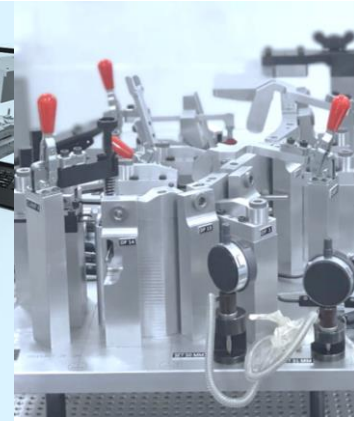

We manage completely your projects thru our high-level suppliers

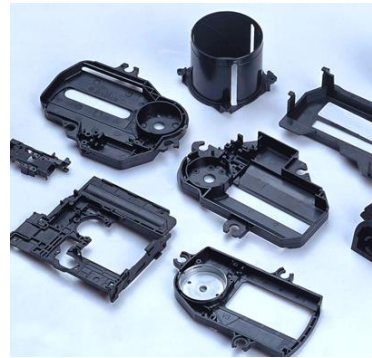

Project Management

Molds Design, Engineering & Fabrication

Checking Fixtures & Smart gauges

Parts sampling

Tooling shipping

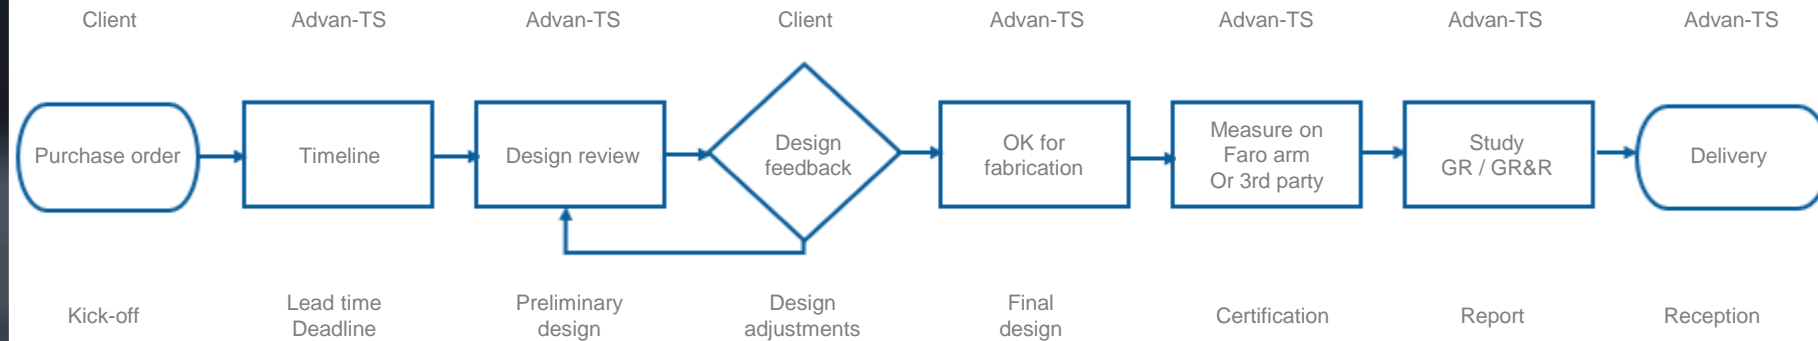

Local support in Mexico

Fixtures & Smart gauges

Local networking capacity

- By attributes or variables
- Automation / Integration: Sensors, actuators, PLC, etc.
- Tolerances: ± 0.01 mm
- Materials: Aluminum / Steel
- Size: Up to 2.8m large
- Heat treatments: Tempered, nitriding, blued, etc.

General flow chart

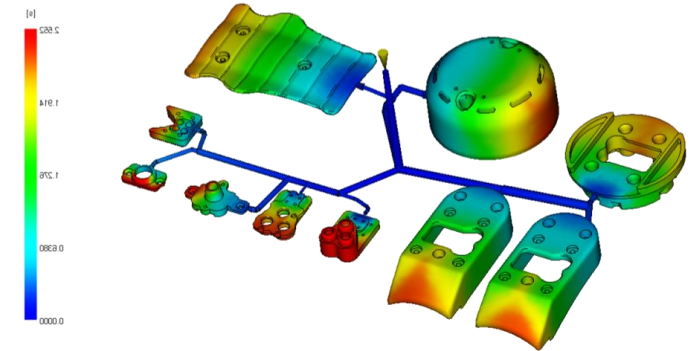

Molds Design & Engineering

Focused on having the most efficient design for the production, with easy maintenance

Our MoldFlow Reports are from a certified supplier

After-sales support in Mexico

Timing

We know that timing is everything.

Therefore, we are committed to bring you a competitive pricing for:

- Lean management with fast response communication
- Reduced lead times
- Accurate support on time

Let us be the partner you are looking for and let us meet your expectations.

Our goal is to keep the things simple

Quality Management System

We work with ISO 9001:2015 certified suppliers:

- ✓ Standardized documentation
- ✓ Steel certificates
- ✓ Trials reports
- ✓ Plastic parts full layout reports
- ✓ Inspection reports prior shipping

Fixtures certification thru certified third party

Local partners with full measurement capacity

- ✓ Faro arm: For 3D laser scanning + Probe
- ✓ Verniers, micrometer, high gauge, etc.
- ✓ Labs with CMM

Advan-TS is under certification process for ISO 9001:2015

Core Commitments

Mission

- Support our customer tooling needs through management of technical development to bring successful results on every project.

Vision

- Develop long term relationship with our customers and suppliers through our intersect values of responsibility, leadership and transparency as a reliable partner for the plastic injection molding industry.

All the aforementioned, through values that identify our company as responsible, trust builder with transparency and full honesty.
